## **Cooper Tools Australia announces the release of a new Farriers Rasp**

**NSW — June 4, 2008** — Today Cooper Tools Australia announced the release of a new farriers rasp. The new rasp which will be used by the farrier industry will be part of the Diamond brand, one of the many leading brands in the Cooper Industries stable. This year Diamond® celebrates 100 years of product design, development and delivery to the farrier industry worldwide.

The new Outlaw 14” Farriers Rasp not only benefits from the specialised expertise derived from serving the farrier industry for 100 years but also from the expertise gained through their sister brand, Nicholson® who are specialists in manufacturing industrial files and rasps. The Nicholson® File Company was formed in 1864 and was the first successful manufacturer of machine made files in the world.

The new farrier rasp, material number HR15, enjoys:

- Superior performance in both wet and dry conditions
- Resists clogging due to the angled tooth face
- Rasp teeth on one side, file teeth on other side, single cut on edges
- Rasp side allows for aggressive, but controlled hoof removal
- File side produces a consistent smooth finish

## **HR15 Outlaw Rasp availability**

The HR15 is available through Stockmans Supplies and other hardware and farrier supplies outlets.

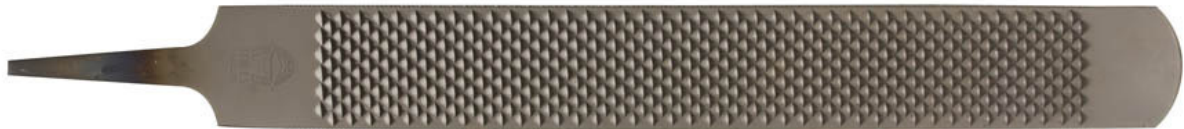

Stockmans Supplies, tel. (07) 3268 6400
